

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

- 1.(Currently Amended) A wire management system comprising:
 - a channel member having at least one wall defining an interior space;
 - a cover having at least one wall, the cover for blocking access to the interior space of the channel member;
 - a shield ~~buried~~ disposed within the at least one walls of the channel member and the cover, the shield for reflecting electromagnetic radiation, the shield not being exposed to the interior space defined by the channel member.
- 2.(Original) The wire management system according to claim 1, wherein the at least one walls of the channel member and cover are formed from a plastic material.
- 3.(Original) The wire management system according to claim 2, wherein the shield is formed from a sheet of metallic material.
- 4.(Original) The wire management system according to claim 1, wherein the shield is formed from a sheet of metallic material.
- 5-7.(Cancelled)
- 8.(Original) The wire management system according to claim 1, wherein the cover comprises a detachable cover.
- 9.(Original) The wire management system according to claim 8, further comprising a snap fastening arrangement for retaining the detachable cover to the channel member.
- 10.(Cancelled)

11.(Original) The wire management system according to claim 10, further comprising means for fastening the channel member to a support surface.

12.(Original) The wire management system according to claim 1, further comprising means for fastening the channel member to a support surface.

13.(Currently Amended) A wire management system comprising:

an outer raceway comprising:

a first channel member defining an interior space;

a first cover for blocking access to the interior space of the first channel member;

at least one inner raceway contained entirely within the outer raceway, the at least one inner raceway comprising:

a second channel member having at least one wall defining an interior space;

a second cover having at least one wall, the second cover for blocking access to the interior space of the second channel member;

a shield disposed within the at least one walls of the second channel member and the second cover, the shield for reflecting electromagnetic radiation, the shield not being exposed to the interior space defined by the second channel member.

14-16.(Cancelled)

17.(Original) The wire management system according to claim 13, wherein the channel members and covers are formed from a plastic material.

18.(Original) The wire management system according to claim 17, wherein the shield is formed from a sheet of metallic material.

19.(Original) The wire management system according to claim 13, wherein the shield is formed from a sheet of metallic material.

20-21.(Cancelled)

22.(Original) The wire management system according to claim 13, wherein the second cover comprises a detachable cover.

23.(Original) The wire management system according to claim 22, further comprising a snap fastening arrangement for retaining the detachable cover to the channel member.

24.(Original) The wire management system according to claim 22, wherein the shield includes a first section disposed within the at least one wall of the second channel member, and a second section disposed within the at least one wall of the second cover.

25.(Previously Presented) The wire management system according to claim 13, further comprising means for fastening the first channel member to a support surface.

26-28.(Cancelled)

29.(New) The wire management system according to claim 8, wherein the shield includes a first section disposed within the at least one wall of the channel member, and a second section disposed within the at least one wall of the cover.
